ACM Digital Library

A half century of pioneering concepts and fundamental research have been digitized and indexed in a variety of ways in this special collection of works published by ACM since its inception. The ACM Digital Library includes bibliographic information, abstracts, reviews, and full texts.

Digital Library Overview

Results 1 - 5 of 5 short listing

- 1** The Nielsen ratings 80%
 Jakob Nielsen , Lynda Hardman , Anne Nicol , Nicole Yankelovich
 Proceedings of the third annual ACM conference on Hypertext September 1991
- 2** Information overload: training consultants to be knowledgeable, not 77%
 “know-it-alls”
 Katie M. Livingston
 Proceedings of the XVIII ACM conference on User services August 1990
- 3** Current technological impediments to business-to-consumer electronic 77%
 commerce
 Gregory Rose , Huoy Khoo , Detmar W. Straub
 Communications of the AIS June 1999
- 4** Context-sensitive learning methods for text categorization 77%
 William W. Cohen , Yoram Singer
 ACM Transactions on Information Systems (TOIS) April 1999
 Volume 17 Issue 2
 Two recently implemented machine-learning algorithms, RIPPER and sleeping-experts for phrases, are evaluated on a number of large text categorization problems. These algorithms both construct classifiers that allow the “context” of a word *w* to affect how (or even whether) the presence or absence of *w* will contribute to a classification. However, RIPPER and sleeping-experts differ radically in many other respects: ...
